

Village of Laura

Minutes of Special BOPA Meeting at Council Meeting

7:00 PM

June 10, 2019

Attendees: President- John Thompson, Bradley Ingle, Steve Vore, Greta Slagle-Clerk.

The purpose of the meeting was to discuss the grease tank at the Laura's Country Diner Restaurant with Council and our Solicitor.

During the regular Council meeting, Mr. Thompson noted the Board was trying to solve the problem of how to handle the grease trap at the restaurant, for a best possible solution for the Village and the restaurant. Mr. Thompson asked Mr. Johnston if we could sell the restaurant one of the two septic tanks at the restaurant. One tank is set up to handle the sewage, and the other tank, we want to consider selling, handles the water from the kitchen. The tanks were installed in this fashion, and we have no idea how long the kitchen septic tank has been used to collect the grease. The bathroom septic tank has been pumped on a regular basis and has never had a problem handling the volume. The Board thinks that selling the kitchen tank to the restaurant would solve the problem for both the village and the restaurant. The restaurant would be responsible for pumping and maintaining that tank and the Village would not have grease in our system. We would make sure we have proof the grease is pumped out of the kitchen tank, and we wouldn't have to be responsible to do this. The Board thinks this is a good solution to the problem and wants to know if we are allowed to sell a tank. Mr. Johnson noted he would have to look into this.

This was the only issue the Board had, the Council meeting continued.

Jonathan Thompson, President

Gretchen Slagle, Clerk
